GUITAR WOOD FOR SALE

Most of the following sets have been in my workshop collection for many years and are now extremely rare, if not impossible to find, and therefore valuable.

If you are a guitarmaker with a customer who is potentially interested in ordering a guitar from you that could be built from one of these sets, I will place the wood on hold for you until your order is confirmed and you have received a deposit to cover the cost of acquiring the set.

These woods are specifically suitable for use in the making of both classical and flamenco guitars. Information can be provided regarding their tonal characteristics.
